

SUZHOU YRC CHEMIST LIMITED

Soda Ash Dense Certificate of Analysis

INCI Name: Soda Ash Dense

CAS NO.:497-19-8

Chemical Structure: Na₂CO₃

Product Specification:

Test Item	Standards	Test Results
Total alkali(quality fraction of na ₂ co ₃ dry basis) % min	99.2	99.46
Nacl (quality fraction of nacl dry basis) % max	0.7	0.36
Fe quality fraction(dry basis) % max	0.0035	0.0009
Water insoluble matter (%)max	0.03	0.01
Whiteness	85min	87.8
Unit bulk density min	0.9	0.99
Particle size siever remaining %180μm min	70	81.28

Product Features:

Soda ash dense is the trade name for sodium carbonate (Na₂ CO₃). It is synthetically produced in large quantities from salt (sodium chloride) .The pure product appears as a white, odorless powder with a strong alkaline taste. It has high hygroscopicity.

Package :

to be packed in 40kg,50kg ,750kgs or 1000kgs JUMBO bag

Shelf life :

During storage and transport, Soda Ash may create soft, easily disintegrating lumps. Guaranteed shelf life of Soda Ash dense is 2 years from the production date. After the expiry date, the product should be controlled again.

Add:B-1308, Huijing Centre,Zhangjiagang, Suzhou, Jiangsu Province, China.
